

# “Painting” Drums in the Drum Editor Window

Click on **Drum** to go to the drum editor window.

Click on a **drum track**, then click on the pattern tool (**paintbrush**) in the tool bar. If you don't see the tool bar, select Tools from the Studio menu. The window on the lower left will appear once you click on the paintbrush. Click and hold to select a **Rhythmic Pattern**. Drag the paintbrush across the track to **paint a pattern**.

Repeat the process to paint on different tracks. Use the **pencil tool** to draw original beats.
